☎ 416 912 5292  
📍 Mississauga, Ontario

## Profiles

🏠 [louispham.dev](http://louispham.dev)  
🐙 [github.com/louis-pham](https://github.com/louis-pham)  
🌐 [linkedin.com/in/louispham](https://linkedin.com/in/louispham)

Full stack developer passionate about clean, straight-forward design that harmonizes with the user experience. Being involved in dance and science, creative experimentation hand in hand with contemplative analysis help me unravel a problem and develop sensible solutions.

## Technical Skills

Strong: JavaScript (ES6) • HTML5 • CSS3 • Node.js • Express • Python

Knowledgeable: MongoDB • Mongoose • PostgreSQL • Django • Java • React • jQuery • Bootstrap

## Work Experience

**Assistant Language Teacher**, Link Interac Inc. | 2017 - 2019 | Yokohama, Japan

- Created and executed lesson plans to facilitate and cultivate an interest of international cultures and the English language

**Researcher**, Canadian Institute for Theoretical Astrophysics | 2016 - 2017 | Toronto, Canada

- Modified simulation tool LensPix with extra functionality, Python wrappers, analysis scripts, etc.
- Tested and debugged to ensure simulation outputs were in line with theoretical expectations

**Student Developer**, University of Toronto KPE Faculty | 2015 - 2016 | Toronto, Canada

- Built online Sports Hall of Fame's front end and API for Drupal back end
- Overhauled physicians' electronic health forms with new capabilities and responsive design
- Created schedule displays showing events/programs for campus' athletic facilities, improving patron experience
- Developed "wayfinder" displays to provide directions, weather, and ongoing events
- Created room search tools to assist faculty in setting up meetings

**Software Developer Co-op**, Canada Health Infoway | 2014 - 2015 | Toronto, Canada

- Built and managed InfoScribe, a Java-based collaboration tool built off Atlassian's Confluence
- Updated interface and capabilities of AngularJS search tool HL7 Explorer
- Updated AngularJS of mockup clinical requirements and specification pages

## Personal Projects

IoU2: "Household-based" budgeting tracker built with Python + Django, PostgreSQL and AWS S3

Dance Events: Event page built with Node.js, Express, MongoDB/Mongoose and Passport OAuth2

Battleship: Browser-based game showcasing DOM manipulation, MVC design and searching

## Education

Software Engineering Immersive, General Assembly | 11/2019 - 02/2020

B.Sc. with Honours in Computer Science and Astrophysics, University of Toronto | 2011 - 2017

**Personal Interests** dance, piano, music, astronomy, video games, technology
